STAY UP TO DATE

Follow us on social media for recent news.

* **FULLY ANIMATED:** videos are displayable

PARTIALLY ANIMATED: elements move smoothly and steadily

STATIC: static image

The calculation of the **CPM is based on three factors: the contact opportunities of a location, the average length of stay of passers-by and the booking price.

Contact opportunities: This is the basis for the calculation.

Average dwell time: Indicates how many spots a contact opportunity sees on average.

Booking price: Enables the calculation for the price of 1000 contacts.

Since the dwell time tells you how many spots a contact opportunity sees on average, it represents a multiplier for the calculation.
